### 👤 SUMMARY

Software Engineer with 20+ years of experience designing and developing scalable applications using Java, Spring Boot, REST APIs, and microservices architecture. I also have hands-on experience building modern web applications with Vue.js, Node.js, and relational databases.

I am passionate about software architecture, system integration, and creating clean, maintainable solutions that solve real business problems. I enjoy working across the full development lifecycle, from designing APIs and database models to implementing and deploying production-ready applications.

I am constantly learning new technologies and best practices, with a strong focus on writing high-quality code, improving system reliability, and delivering value through technology.
